Boda Boda - Motorcycle taxis in East Africa

AGENDA

During this presentation :

- Overall status
- About the previous week
- Time Tracking
- About the coming week
- Obstacles, risks or issues
- Questions for the steering group

OVERALL STATUS

- On track right now

- Application has some frontend integrated
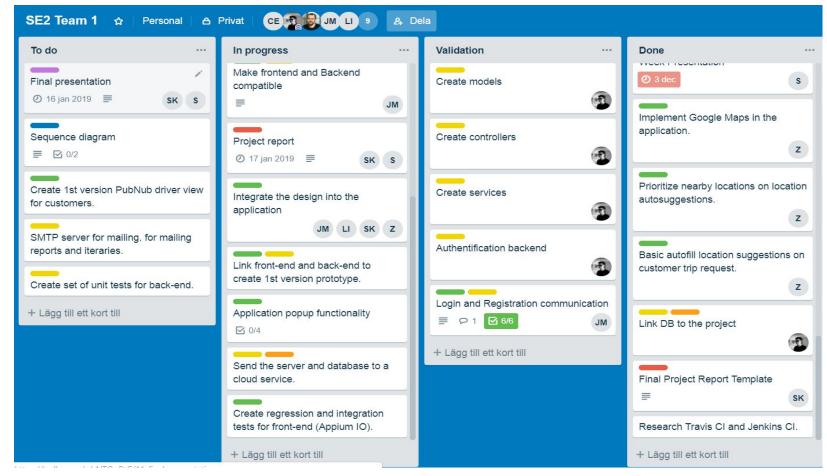

PREVIOUS WEEK

- Connecting the design to the frontend

- Final report been started

- Server and database deployed

- More tweaking on the backend

PREVIOUS WEEK

In progress

Make frontend and Backend compatible
☰ JM

Project report
🕐 17 jan 2019 ☰ SK S

Integrate the design into the application
JM LI SK Z

Link front-end and back-end to create 1st version prototype.

Application popup functionality
☑ 0/4

Send the server and database to a cloud service.

Create regression and integration tests for front-end (Appium IO).

+ Lägg till ett kort till

Validation

Create models

Create controllers

Create services

Authentification backend

Login and Registration communication
☰ 💬 1 ☑ 6/6 JM

TIME TRACKING

NAME	WEEK WORK (IN HOURS)	TOTAL WORK (IN HOURS)
Aleksandar Acimovic	12	75
Zacharias Leo	35	123
Jonathan Major	27	103
Chingiz Esenbaev	14	46
Linus Sens Ingels	21	103
Stanislas Pedebearn	10	52
Sireesha Kumari Kulari	22	63

COMING WEEK

- Work on the final report

- **Application:**
  - More work on the frontend design
  - Continue connecting the backend to the application
  - Continue to work on a prototype
  - Create communication between customer and driver

RISK AND ISSUES

- **Back-end:**
  - Entity Framework - lack of experience, relationships not mapping properly onto the database

- **Front-end:**
  - PubNub geolocations - experience lacking, research needed
  - Unexpected difficulties while implementing the design, because of outdated API.
  - Lack of experience of the web API communication.

GROUP QUESTIONS

- **Nothing :)**
